

Beyond their function

Property Info and Database Action Button

- Property Management serves as the parent entity overseeing all associated units.

Billing and Collection Action Button

- Penalties
- Autogenerated billing schedules
- SOA generation
- Yearly escalation

Utilities Module

- This module manages the assignment of account numbers to properties for both electricity and water services.
- includes a computation system that distributes the total monthly utility charges—such as electricity and water—across individual units within a property, ensuring each unit is billed fairly based on usage or allocation.
